Canadian 455 has 22.3% efficiency with 30 year warranty.

Canadian Solar Inc. was founded in 2001 in Canada and is one of the world’s largest solar technology and renewable energy companies. It is a leading manufacturer of solar photovoltaic modules, provider of solar energy and battery energy storage solutions, and developer of utility-scale solar power and battery energy storage projects. Canadian Solar is one of the most bankable companies in the solar and renewable energy industry, having been publicly listed on the NASDAQ since 2006.

2) Tesla Solar Inverter offers improved aesthetics, reliability and native integration with the Tesla ecosystem for both Solar Roof and solar panel systems.

3) Ironridge Racking:

Generally thought of as making some of the physically toughest racking equipment, Ironridge is another popular solar racking manufacturer. They offer pitched roofs, flat roofs, and ground-mounted racking solutions. Ironridge is based in California and has been operational since the mid-1990s.

\* EnergySage calculates the values above based on: values provided by the installer for this quote, installer-estimated loan terms assuming good credit history, the electric bill information you provided, historical market utility rate data, an energy cost inflation estimate of 2.3% (source: EIA 10-year MD avg.), Federal ITC (Investment Tax Credit) of 30% of net cost for purchases, and [carbon conversion factors provided by the US EPA \(Environmental Protection Agency\)](#). Cash Purchase savings projections are also based on estimates of future SREC (Solar Renewable Energy Certificates) value. [Learn more about SRECs](#). Check with your utility about rates and fees that may apply to your solar installation. MD SREC estimates represent a conservative estimate based on market projections over the next 15 years.

Make an impact.
